EXPERIENCE

May 2019 – August 2019 | Seattle, WA

Google UX Design Intern

I interned on the Google Duo Team. I designed new video-sharing and video calling features that enable users to share moments with their close ties regularly and more intuitively. I also participated in design sprints, assisted in product visioning and pitching, and offered feedback to other designers to help improve the UX of their designs.

January 2019 - August 2019 | Richmond, VA

VCU Web Assistant

I designed and launched new websites for the VCU College of Engineering as well as refreshed the overall user experience of older sites. These changes led to increased site navigability, speed, and performance.

May 2018 - August 2018 | Washington, D.C.

L5 Advertising Web Design Intern

I collaborated cross-functionally with developers and account managers to design and launch custom Wordpress websites for RV clients. I created a reusable design system to lessen the time to deploy new landing pages.

April 2016 - May 2018 | Fairfax, VA

GMU Activities Council President

I led a team of event planners in creating over 30 events each year for the campus community. Events ranged from smaller pop-up activations to larger live concerts and fashion shows. We handled event production from booking, setting up, to designing marketing materials such as posters and social content.

EDUCATION

VCU Brandcenter
MS in Experience Design
Expected May 2020
